

If the bond passes, the district plans to add air conditioning to high school classrooms using district general funds as part of our five (5) year and fifteen (15) year facilities plan. Money that would normally be budgeted for roofing, parking lots, lighting, and other items in our traditional budget will be covered with the bond proposal, and therefore can be used for other projects like adding A/C to the high school. Adding A/C to the high school would occur at the same time as the other building projects for the district, with several classrooms added each summer over the course of approximately 5 years.
