

If a business has been granted an Industrial Facilities Tax ("IFT") credit, then only half of the taxable value is subject to the bond millage. The business would need to verify if some of the taxable value has been designated for the IFT credit.

One item a community member could research is the Michigan Homestead Property Tax Credit. The Michigan Homestead Property Tax Credit is a method through which some taxpayers can receive a credit for an amount of their property tax that exceeds a certain percentage of their household income. This program establishes categories under which homeowners or renters are eligible for a Homestead Property Tax Credit. We would recommend that community members consult their tax provider to determine if they are eligible for this tax credit.
